Principal's Message:

Welcome to Mount Stromlo High School.

As a Year 7 to 10 school, we cater to the individual needs of all our students by providing a nurturing, inspiring and dynamic learning community that supports students to reach their potential. High expectations are placed on students to proactively engage with their learning, attain their learning goals and achieve their best.

At Mount Stromlo High School, we are committed to continual improvement, guided by the values of **Learning, Respect, Endeavour** and **Pride**. Our values provide a framework to ensure students succeed academically, socially and personally through a variety of pathways, tailored to individual needs.

We are committed to developing individual talents through an engaging and individualised curriculum, with multiple extra-curricular activities available to students including school band, team sports, student leadership, performing arts productions and mentoring students at our local primary schools. In addition to the core subjects of Mathematics, Science, English, Physical Education, Humanities and Social Science, we offer programs in outdoor education, sustainability, French, Japanese, creative and performing arts, design and technology.

We have highly trained staff who are specialists in their area with innovative and engaging teaching practices. They are committed to building a safe and inclusive learning community for all students at Mount Stromlo High School.

A successful school has effective, positive partnerships between students, staff, parents and the wider school community. As Principal, I will maintain and continue to develop these partnerships as they enable high achievement for our students. I welcome and encourage you to become an engaged member of our school community.

If you would like to know more about our vibrant learning community, please do not hesitate to call the school to make an appointment.

Regards

Peter Radford

Mission and School Values

Mission Statement

Mount Stromlo High School strives to provide a safe and caring education environment where every student is encouraged to achieve individual excellence, self-reliance and responsibility.

School Values

Learning

At Mount Stromlo, we value *Learning*. Learning provides students with a positive and productive future full of challenges and satisfaction. The quality education provided by our teachers enables our students to contribute positively and productively to our community and society.

Respect

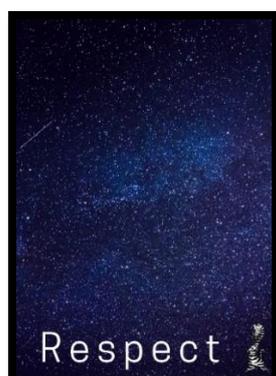

Respect for self and for others is essential for a successful learning community. Every member of the Mount Stromlo community respects the right of others to learn and feel safe.

Endeavour

We *Endeavour* to do our best in everything we do. By participating fully in our community and seeing challenges as opportunities allows students and staff to develop a high level of self-respect and pride in their achievements. Everyone learns differently. Everyone has strengths. At Mount Stromlo students are assisted and encouraged to realise their strengths and reach their potential; and to further enhance their learning and development.

Pride

Personal pride and pride in the school community is an important value demonstrated at Mount Stromlo. Endeavouring to do our best; to be involved; care for others and to show initiative develops a great sense of *Pride* in personal achievements and in being a Mount Stromlo student.

Enrolment

Mount Stromlo High School welcomes all students from the Priority Placement Area (PPA) suburbs of Chapman, Coombs, Denman Prospect, Duffy, Fisher, Holder, Rivett, Stirling, Uriarra Village, Waramanga, Weston, and Wright. Any student living in our school's PPA is entitled to a place in the relevant Year 7 – 10 cohort. Uriarra residents access schools closest to them on the transport route. This may include Mount Stromlo High School.

Applications for enrolment for **the current year** may be lodged at any time during the year and are processed as received. Please complete an Application to Enrol/Transfer in an ACT Public School on the Education Directorate [website](#). If you do not have access to the Internet please contact the school and the front office staff will assist you.

Once the online application has been received (for current year enrolments) the front office staff will contact you by phone to arrange an enrolment interview with the Deputy Principal. Please bring

- Proof of student's residential address (house lease, electricity account. NB drivers' licence and mobile phone account are not proof of address)
- Proof of student's identity and date of birth (birth certificate or passport)
- Copies of any family law or other relevant court orders relating to the student
- Previous school reports
- Portfolio of work (if available)
- Emergency medical treatment plan (if required)

Enrolments for the **2021** school year commence **6am Tuesday 28 April 2020**. Application is to be made via the ACT Education Directorate [website](#). Enrolment applications made between 28 April 2020 and 5 June 2020 will receive an offer from 27 July 2020.

Mount Stromlo High School has a Learning Support Centre (LSC), Learning Support Unit (LSU) and a Learning Support Unit - Autism specific (LSUA). These programs are for students with a significant learning delay, an intellectual disability or who meet the ACT Student Disability criteria for Autism Spectrum Disorder. Places in the LSC, LSU and LSUA are decided by Disability Education, ACT Education Directorate. If your child has a disability and you would like more information about what services and support is available, please contact the school psychologist at your current school. If your child is not currently enrolled in an ACT public school, please contact the ACT Education Directorate on (02) 6205 5429.

Curriculum

The Mount Stromlo High School [Curriculum](#) offers a broad education within a structure that allows choice and addresses each individual's interests, needs and strengths.

The focus of the curriculum is to develop each student as a learner, a person, a member of the community and a contributor to society. This is achieved through timetabled classroom programs and the extra-curricular opportunities available for students.

Classroom studies comprise the eight learning areas of:

- English
- Mathematics
- Science
- HaSS (Humanities and Social Sciences)
- The Arts
- Technology
- Physical Education and Health
- Languages (Japanese or French)

Students study seven subjects in each semester (half-year). Each subject has seven one-hour classes during a fortnight.

In years 7 and 8 students are given the opportunity to study a wide range of units within the Arts and Technology area. Over the two-year period, they will complete 8 term long units of work drawn from the Arts and Technology. This experience supports a smooth transition to high school as well as encouraging wise and informed decision making in subsequent years where students choose from a range of options.

English

Today a reader, tomorrow a leader. – Margaret Fuller

At Mount Stromlo High School we aim to engage students in the subject of English; challenging and deepening their understanding of literature, literacy and language through the English Textual Concepts. The study of English helps young people develop the knowledge and skills needed for education, training and the workplace. It helps them become ethical, thoughtful, informed and active members of society.

Students are given the opportunity to engage with a variety of texts including; novels, films, plays, Shakespeare, poetry, short stories, picture books, advertising materials and live performances. They listen to, read, view, interpret, evaluate and perform a range of spoken, written and multimodal texts in which the primary purpose is aesthetic, as well as texts designed to inform and persuade. Students develop their understanding of how texts, including media texts, are influenced by context, purpose and audience.

Mathematics

Mathematics at Mount Stromlo High School is a core subject for all students in all years. Over the four years of high school students will explore and build their skills in the numerical categories outlined in the Australian National Curriculum: *Number and Algebra, Measurement and Geometry, Statistics and Probability*. Numeracy is a fundamental skill that students will utilise across the curriculum and will experience in a range of subject areas.

During time at Mount Stromlo High School students will be encouraged and invited to participate in several Mathematics events, including the Australian Mathematics Competition, sponsored by The Commonwealth Bank. Our results from previous years include several prize winners with many of the participants receiving Distinction and Credit awards. Students from Extension classes are invited to participate in the Mathematics Challenge.

At Mount Stromlo High School students in years 7 and 8 have access to the Mathletics online learning platform, while in years 9 and 10 students will move to the Mathspace online platform. Additionally, all students receive an online account to access an interactive digital textbook along with a wealth of additional resources. These platforms are used to support students learning of Mathematics by digitally upskilling mathematical skill sets.

Mathematics and the ability to numerate are vital to a person's successful participation in society. To be numerate is to use mathematics effectively to meet general demands of life at home, in paid work, and for participation in community and civic life. This is what Mount Stromlo High School strives to develop in students to help them become successful numerate adults.

Humanities and Social Science

Humanities and Social Science is the study of History, Geography, Civics and Citizenship and Economics and Business. At Mount Stromlo High School students develop the ability and skills to become inquiring learners. This is done through developing their ability to question, think critically, solve problems and communicate. Students are encouraged to not only consider the topic at hand but also its relationship with and implications for the present and the future. In year 7 and 8 students are given the opportunity to study all four subjects.

Science

Scientific literacy enables students to gain an understanding of the natural world, investigate and solve problems - essential skills for the 21st century learner. Students are offered a broad range of theory and practical work with an emphasis on engaging real-world activities, including laboratory-based experiments, field studies and ICT based activities. The faculty has an extensive range of scientific equipment that is used by students in practical sessions and for teacher demonstrations, including a brand new state of the art photographic microscope, a range of optical telescopes, wireless data loggers, heart rate monitors, 3D printers and much more.

Students also have access to a range of digital resources and interactive tools delivered through our online learning platforms, Google classroom and Stile.

For many students, the Year 7 course is their first introduction to working in a science laboratory. The course develops a foundation in scientific safety, literacy and numeracy skills to ensure students can meet the expectations and demands of later years. As students' progress in developing their scientific literacy, we cover a broad range of topics from the scientific disciplines of Physics, Chemistry, Earth Sciences and Biology. An emphasis is placed on developing scientific inquiry skills and making evidence-based decisions. In our Lex@s classes students take on scientific investigations as part of their extended learning.

Languages

At Mount Stromlo High School all students in year 7 and 8 are encouraged to learn a language other than their own mother tongue, as doing so enables new and different ways of seeing the world. Students have the choice of learning French or Japanese. Students are strongly encouraged to continue with the language they began learning in Primary School in order to build on their existing understandings. Students may continue studying Japanese or French as an elective choice in year 9 and 10.

Japanese

Students studying Japanese learn the Hiragana and Katakana scripts and begin to learn Kanji characters. Students learn the geography, history and culture of Japan, and are given many opportunities to experience Japanese culture, including Japanese art and cuisine, in classes, on-line and on excursions. A student trip to Japan is generally offered every second year (in 2020 a Japan trip was planned, so the next Japan trip will be in 2022).

French

Students studying French will develop skills in vocabulary and pronunciation, as well as writing in French. Students will also be taught about French culture which has contributed to the shaping of global movements and traditions associated with domains such as the arts, cinema, philosophy and cultural theory, as well as fashion, design, food and wine. Mount Stromlo has traditionally offered a student trip to a French speaking country every second year. In 2019 students visited New Caledonia and a trip to France is anticipated in 2021.

External Languages Programs

We currently have a small number of students that are studying languages other than our offered curriculum. The list (at present) includes Indonesian, Italian and Advanced

Japanese. The programs provided are by other educational institutions. Students that are wanting to undertake learning a specific language need to discuss with the school management and we will see if we can find a workable solution.

Health and Physical Education

The Health and Physical Education curriculum at Mount Stromlo High School emphasises the importance of living an active and healthy lifestyle and the need to make informed, responsible decisions.

Students participate in a range of fitness and skill development activities including; badminton, soccer, netball, softball, hockey, AFL, dance, athletics, touch football, basketball, cricket, tennis, volleyball, sof-crosse, dance and fitness games. Health lessons focus on growth and development, relationships, safety and first aid. We also offer three electives in Yr 9/10 which include sports science, sports coaching and Outdoor education.

Throughout the school year, students are invited to try-out for a variety of school sporting teams. These teams are coached by school staff and join school-aged competitions.

The Arts

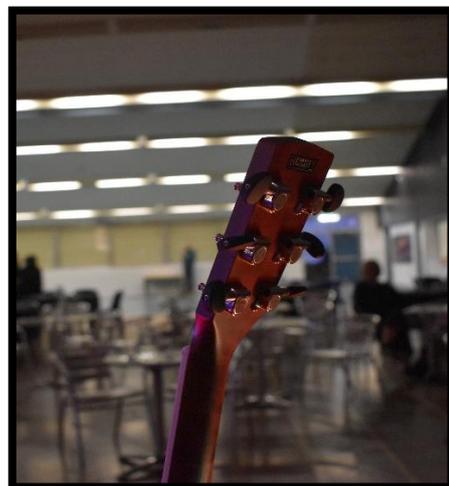

The Arts have the capacity to engage, inspire and enrich all students, exciting the imagination and encouraging students to reach their creative and expressive potential. The five distinct but related Arts courses — Dance, Drama, Media, Music and Visual Arts — share and communicate understanding and expressions of ourselves and others. Rich in tradition, the

arts play a major role in the development and expression of contemporary cultures and communities, locally, nationally and globally.

The Arts program at Mount Stromlo High School provides students with experience and skills in all five areas of the Arts. Through the Arts, students learn to explore and express themselves as they discover and interpret the worlds around them, communicating ideas with current and emerging technologies and using arts knowledge and understanding to make sense of their worlds.

In year 7 and 8 students complete an Arts and Technology rotation which includes a selection of the following subjects; Dance, Drama, Music, Visual Art, Food, Makerspace, Photography, Metal Art, 3D Sculpture and Woodwork. In year 9/10 students choose from a range of electives that develop technique, performance and production skills. Subjects offered may include Painting, Printmaking, Sculpture, Ceramics, Digital Photography, Graphic Design, Digital Art, Dance, Music Industry, Drama, Design & Technology, Media Production and Film Making.

There are multiple performance opportunities for students throughout the school year. Students can participate in a range of productions and events including Dance Festival, the Acting Techniques annual play, Music Soiree, Floriade, Canberra Show, Limelight, Band Eisteddfod and various community events and fetes. Photography and Art students regularly display their work around the school, at external exhibitions and at school events. Visual and performing arts students are invited to participate and perform in our end of year show, 'StromFest', which takes place over two nights at the Canberra College Theatre.

Technology

The Technology Faculty at Mount Stromlo High School aims to provide students with engaging learning opportunities in practical environments to help students become lifelong learners. To achieve this, students are exposed to a model of learning that embraces the concepts of

design, make and appraise – an approach that aims to encourage students to plan, experiment test and reflect upon the development and manufacturing processes.

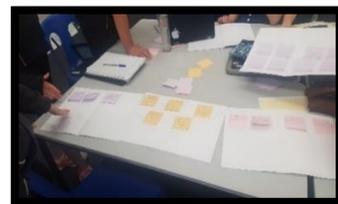

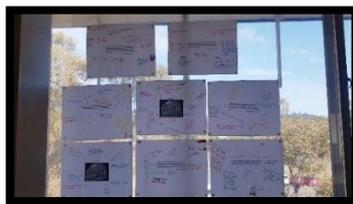

In year 7 and 8 students complete an Arts and Technology rotation which includes a selection of the following subjects; Dance, Drama, Music, Visual Art, Food, Makerspace, Photography, Metal Art, 3D Sculpture and Woodwork. In years 9 and 10 students are able to choose from a range of electives that further develop skills and knowledge. Courses offered may include; Design and Technology, Maker-Space Projects, Robotics, Game Design, Woodwork, Metalwork, Jewellery Making, Eating for Good Health, Asian Cooking and Hospitality.

Students are given many opportunities to showcase their work throughout the year including preparing and serving food at school functions and exhibiting work at school events.

Learning Extension

LEX@S

The Learning Extension At Stromlo (LEX@S) Program is offered to suitable students from years 7-10 at Mount Stromlo High School. We recognise the need to extend students in their learning where students demonstrate an aptitude in different subjects. Our program aims to appropriately challenge and extend students in one or more key learning areas; English, Maths, Science and HaSS. Students in the LEX@S Program will be offered a modified curriculum that extends learning, scope for leadership and access to extracurricular excursions among other enrichment learning opportunities.

Learning Support

Inclusive Philosophy

Fairness does not mean everyone gets the same, it means everyone gets what they need. Mount Stromlo High School is an inclusive school that provides a range of programs and resources to meet the individual needs of students. We adopt a flexible approach to learning and build partnerships with parents to ensure the best outcomes for students.

Inclusive Model

Mount Stromlo High School has a Learning Support Centre (LSC), a Learning Support Unit (LSU) and a Learning Support Unit Autism specific (LSUA) and a number of students accessing the Inclusion Support Program (ISP). Eligibility into these programs is determined by the

school psychologist and allocations of placements is determined by a central Education Directorate panel.

Small group classes are run for students in these programs where they complete a modified program, based on mainstream content, in the subjects of Mathematics, English, Humanities, and Science. Students are integrated into mainstream classes for Physical Education and Health and their elective subjects. Students are supported in mainstream classes with appropriate adjustments made as determined by their Individual Learning Plan (ILP). Students may also be supported by a Learning Support Assistant (LSA) to undertake key learning activities.

Literacy Support

Literacy support classes are available to Year 7 and 8 students as an alternative to learning a language. Lessons incorporate the MacqLit literacy intervention program (developed by Macquarie University) with additional small group instruction in reading and writing strategies. The aim is to further equip students with the literacy skills needed to achieve across the 7-10 curriculum.

Extra - Curricular

Band

Students from year 7-10 who are experienced musicians are invited to join the Concert Band or Jazz Band. The Concert Band is an extracurricular group for woodwind, brass and percussion musicians. Repertoire comprises of music from a range of genres, including contemporary artists and soundtrack compilations. The Jazz Band provides students with the opportunity to work in a small ensemble, solo, improvise and accompany others. The Concert and Jazz Band perform at a range of events; these may include school assemblies, school events such as Open Night and Graduation, and external events such as the National Eisteddfod, Floriade and School Fetes.

Homework Club

Mount Stromlo High School offers a homework club which runs immediately after school one day a week from 3:00pm until 4:30pm. The club is staffed by teachers from various faculties. The homework club gives students the opportunity to work on assessment items including assignments, test revision and class work, or to catch up on work missed due to absences.

Debate Club

Students in the Mount Stromlo Debate Club participate in the ACT Debating Union Competitions throughout the year, as well as the Interschool Parliament Debates held twice a year at the Legislative Assembly. Training is held weekly after school and provides a friendly and welcoming space for students to develop their debate skills. Students from all year groups are encouraged to participate in the Debate Club.

Student Support

Mount Stromlo High School endeavours to provide a positive and inclusive educational environment rich in quality teaching and learning. Quality teaching is predicated on quality pedagogy, quality curriculum, and quality assessment. Student management procedures at Mount Stromlo are a partnership between students, teachers, parents and the community based on a mutual regard for our school values of **Learning, Respect, Endeavour, and Pride**.

Mount Stromlo High School's student services processes are underpinned by a strong commitment to Restorative Practices and the belief that students need the opportunity to stop and reflect on their own behaviour and be supported to learn about appropriate behaviour for the situation. Students who respect the school values, their right to learn and the learning entitlement of others are acknowledged and rewarded in a variety of ways at Mount Stromlo.

Our rewards system is based on displays of our school values. Students receive BRONZES, and then work towards SILVER and GOLD awards. End of term celebrations are held for the school sports house who obtain the most amount of BRONZES.

Policies and Procedures

Assessment and Reporting Policy

At Mount Stromlo the focus of assessment is to provide timely and valuable feedback to students and their parents/carers in relation to the student's achievements towards learning goals. An essential part of our assessment is formative assessment. Formative assessment is used to monitor student learning and to provide ongoing feedback that can be used by the teacher to improve their teaching and students in turn will improve their learning outcomes. For more information please go to Assessment and Reporting section of the school website.

Homework Policy

The focus of homework is to consolidate learning from the classroom. Homework is intentionally designed by teachers to be relevant, challenging and meaningful. It provides the opportunity to apply what has been learnt in class, the complete unfinished task and develop self-directed learning skills.

Mobile Phone

Students may bring a mobile phone to school. Students are to keep the phone turned off or on silent in their bag during class time. Students are not to take photos, video or audio of anyone during the school day without the permission from a teacher and the consent of the person the recording is of.

Uniform

Students are encouraged to wear the school uniform with pride. Parents and students may choose from a variety of school uniform items. Some prefer the more casual option of the school polo shirt and black pants; others may choose a tailored white shirt with school logo and black pants. The variety of school uniform items ensure each person can feel comfortable in their uniform. The school uniform can be purchased from Savvy School Wear Tuggeranong.

Safe and Supportive School

Everyone has the right to feel safe at school. Bullying, harassment and violence are unacceptable behaviours at Mount Stromlo High School and the community. When relationships between students become challenging and break down, we are presented with the opportunity to teach students to reflect on their behaviour, the impact it has on others and develop ways to foster appropriate relationships.

Criteria for the Award of a Year 10 Certificate

To be awarded a Year 10 Certificate students are required to reach a satisfactory standard for academic achievement, behaviour and attendance over the course of years 9 and 10.

Timetable

MSHS has a two-week timetable. The school day commences at 8.45am when the warning bell (song) is played and the school day ends at 3pm. There are 7 lines with 7 classes over the fortnight. TEAM meets each morning for 10 minutes and an hour during week A, these lessons are developed with the year coordinator and relevant team.

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
8:45am Warning Bell	Week A				
8:50am	Team				
9:00am Period 1	3	6	4	1	7
10:00am Period 2	7	2	6	5	1

12:30pm Period 4	3	1	4	2	6
1:30pm	Break 2				
2:00pm Period 5	5	6	2	1	7

Library

The library is a welcoming space where students can read, study and enjoy quiet social activities, such as board games. There are lots of books from every genre, and students are encouraged to provide suggestions for new books. Students can borrow books during breaks, and new books are added every month. Students can also get support accessing the Directorate's digital collection in the library. Classroom teachers can bring students to the library to support research tasks. The library is also set up to host events, with 6 TVs, a large drop-down display screen and a library wide sound system.

Getting to and from school

Students may walk, ride or catch a bus to school. The school has a very large bike area within which bikes, scooters and boards may be stored securely during the school day. To plan the best way to travel from home to school you may choose to use the [Transport Canberra's Journey planner](#).
