

Year 7 Science

Semester 1 Course Outline

In semester 1 students will describe techniques to separate pure substances from mixtures. Students will explore the diversity of life on Earth and continue to develop their understanding of the role of classification in ordering and organising information. They will describe situations where scientific knowledge from different science disciplines and diverse cultures has been used to solve a real-world problem. They will make accurate measurements and control variables to explore relationships between system components and consider the role of science in decision-making processes.

Learning Outcomes

Students are assessed against personalised learning outcomes. Parents are encouraged to contact the class teacher to discuss this further.

Assessment Tasks

Students will be assessed on their participation and completion of classwork and assessment tasks.

Task	Week Due*
Class tasks and activities (collected in a learning portfolio)	Ongoing
