

Year 9 Economics & Business P Program

Semester 2 Course Outline

This semester students will be introduced to the concept of an 'economy' and explore what it means for Australia to be part of the Asia region and the global economy. The responsibilities of participants operating in a global workplace, as well as how and why businesses seek to create and maintain a competitive advantage in the market, are also considered.

The economics and business content at this year level involves two strands: economics and business knowledge and understanding, and economics and business skills. Students will learn the content through contemporary issues, events and/or case studies.

The Learning Outcomes for this course have been personalised to suit the individual's learning program.

Learning Outcomes

Students will be assessed on the following Learning Outcomes:

- 5.570 - Describes factors that influence choices as consumers and identifies strategies that can be used to inform these choices
- 5.575 - Interprets data to identify and describe distributions, simple patterns and trends, and to infer relationships, and suggest conclusions based on evidence
- 6.609 - Explains why it is important to be informed when making consumer and financial decisions
- 6.610 - Identifies the purpose of business and recognises the different ways that businesses choose to provide goods and services
- 9.832 - Applies economics and business knowledge, skills and concepts to familiar, unfamiliar and hypothetical problems
