

Year 9/10 Outdoor Education 2

Semester 2 Course Outline

In this unit, students will develop basic knowledge and skills and will experience a range of practical learning opportunities. Activities include - backcountry skiing, overnight camping, bushwalking, rope skills, and tree planting. Theoretical tasks will be paired with the practical so students can develop a holistic understanding and appreciation of the safety and environmental considerations which encompass activities in the outdoors.

Learning Outcomes

Students will be assessed on the following Learning Outcomes:

- 9/10.1086 - Applies and transfers movement concepts and strategies to new and challenging movement situations.
- 9/10.1088 - Works collaboratively to design and apply solutions to movement challenges.

Assessment Tasks

Students will be assessed on their participation and completion of classwork and assessment tasks.

Task	Week Due*
Outdoor Ed Passport	Ongoing
Ecological Study	Week 7, Term 4
Application of practical skills on camps and excursions	Ongoing based on camps and excursion dates

*Due dates are an estimate only
